

Installation

This product is designed to enhance existing fences and new installations.

All posts are 12" x 12" x 64" tall and can be buried for shorter applications.

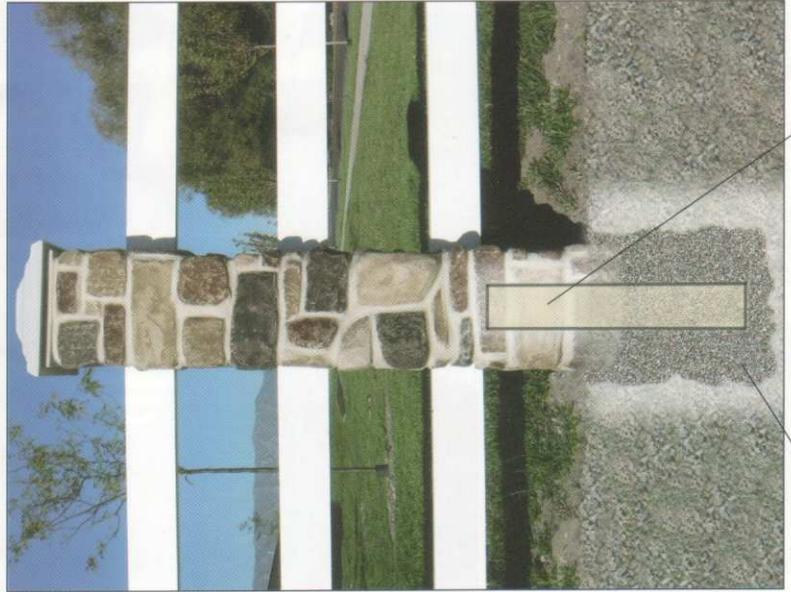

When setting elevation, it is important to establish the height by the finished concrete elevation in the initial hole.

The CHD Post is slid over the pre-installed 4x4 or other existing post and secured into place by putting additional concrete or gravel inside the CHD Post.

For corner posts, gate post, mail box, or signs, the entire CHD Post may be filled with concrete.

Cutting the CHD Post for vinyl, split rail, log, etc. is simple!! By using a holesaw, router, or jigsaw, holes can be cut through the 1/4" wall to receive any configuration.

The simulated concrete cap is removable and is designed to accept different lighting applications.

Six foot privacy fence with Reproduction Rock Post installed on top of riser.

Post

***“If you can’t tell the difference,
what difference does it make!”***

**The rich look of laid-up rock
has existed for centuries and
stands for solid endurance.**

**CHD Products, made of
MDPE, keep that same rich
look and will provide many
years of service and beauty.**

**Our product provides all that
real stone or brick provide yet
is more resistant to weather,
simple to install, costs less and
is easier to maintain.**

Meticulous hand
finishing has
created a finish
so real that it is
difficult to tell
the difference.
