| <b>Warning:</b> The manufacturer recommends that all DELTA FORCE® barbed tape obstacles that are mounted on walls and fences have a minimum installation height of 2.13 meters (7 feet) from ground level. The material shall be installed in such a manner as to avoid any and all contact by non-intruding pedestrian traffic. It shall also present an open, obvious and highly visible condition of danger. DELTA FORCE® barbed tape obstacles should only be used as ground barriers in proper locations, such as correctional facilities, military bases, or other highly sensitive areas. DELTA FORCE® barbed tape obstacles are not meant to be used as ground barriers in commercial, light industrial, or other private applications. DELTA FORCE® barbed tape obstacles are not manufactured for use in any residential applications. |                     |                                                                                     |                                                                                     |                                   |                                       |                                                                                             |                                           |                                       |                                      |                                       |                                        |                                     |                      |

NOTE: Upon request, selected Delta Force® products can be ordered with a larger or smaller quantity of loops per coil or with additional attachments per loop.

| WARNING: All Whiplash® and DefCon® Barbed Tape Obstacle Systems can be used for correctional facilities, military operations, and anti-terrorism deployments. They are not meant to be used as ground barriers in commercial, light industrial, or other private applications. In such cases, a minimum installation height of 7 feet (2.13 meters) from ground level is recommended, and the entangle-ment system must be deployed in a manner that avoids any and all contact by non-intruding pedestrian traffic. It must also present an open, obvious and highly visible condition of danger. Delta Force® barbed tape obstacles are not manufactured for use in any residential applications. |                                                                                                                                                                                             |          |      |          |                 |                       |                       |                     |                      |

| WARNING: All CounterPoint®, Nemesis® and ReCoil® Barbed Tape Obstacle Systems can be used for correctional facilities, military operations, and anti-terrorism deployments. They are not meant to be used as ground barriers in commercial, light industrial, or other private applications. In such cases, a minimum installation height of 7 feet (2.13 meters) from ground level is recommended, and the entanglement system must be deployed in a manner that avoids any and all contact by non-intruding pedestrian traffic. It must also present an open, obvious and highly visible condition of danger. Delta Force® barbed tape obstacles are not manufactured for use in any residential applications. |             |          |      |          |                 |                       |                       |                     |                      |
