Software Registration and the DoorKing IM Server™

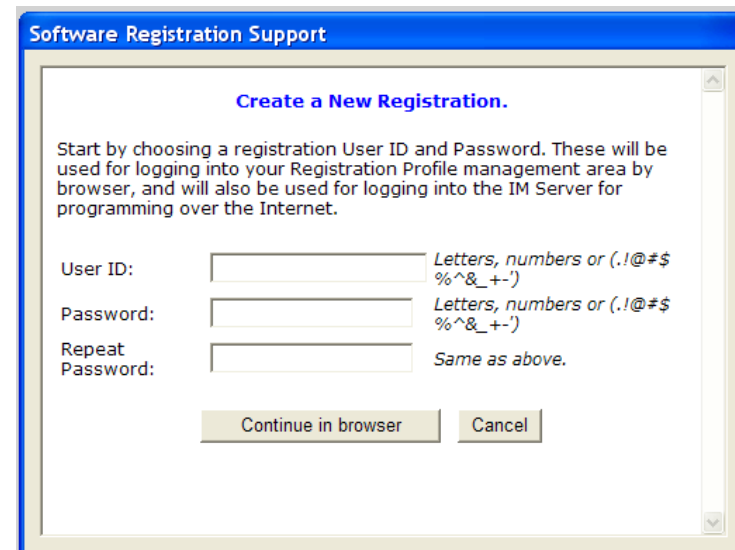

Internet Modem (IM) Server Program Summary

DoorKing, Inc.®
info@doorking.com
www.doorking.com

Advantage - DoorKing®

Software Registration

- When installing the DoorKing Remote Account Manager Software (v6.3.c), you will be asked to “Register” the software
- Registration is a simple process that will only take a few minutes. By registering the software, you will be able to receive important notices on software updates and new features as they become available.
- This is also require if you plan on using the DoorKing IM Server to program your entry systems.

The screenshot shows a window titled "Software Registration Support" with a blue header. Inside, there's a section titled "Create a New Registration." in blue. Below this, a paragraph explains that the user ID and password will be used for logging into the Registration Profile management area and the IM Server. There are three input fields: "User ID:", "Password:", and "Repeat Password:". Each field has a text box and a hint. The "User ID:" hint is "Letters, numbers or (.!@#\$%^&_+~)". The "Password:" hint is "Letters, numbers or (.!@#\$%^&_+~)". The "Repeat Password:" hint is "Same as above.". At the bottom, there are two buttons: "Continue in browser" and "Cancel".

Software Registration Support

Create a New Registration.

Start by choosing a registration User ID and Password. These will be used for logging into your Registration Profile management area by browser, and will also be used for logging into the IM Server for programming over the Internet.

User ID: Letters, numbers or (.!@#\$%^&_+~)

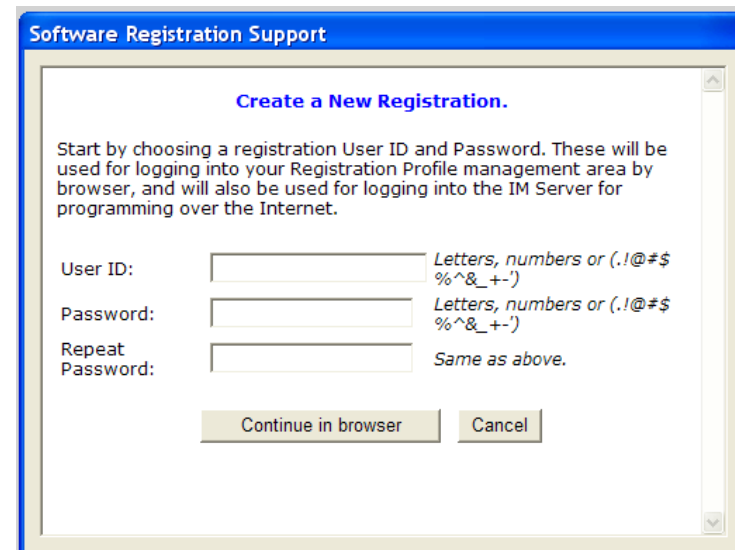

Password: Letters, numbers or (.!@#\$%^&_+~)

Repeat Password: Same as above.

Advantage - DoorKing®

Software Registration

- If you choose not to register the software at the time of installation, you will have the option of registering the next time you open the DoorKing software.
- If you do not have an internet connection, you may register at a different PC and receive a “Registration Code” which can be placed into the software on your PC to eliminate this reminder.

The screenshot shows a window titled "Software Registration Support" with a blue header. Inside, there's a section titled "Create a New Registration." in blue text. Below this, a paragraph explains that the user ID and password will be used for logging into the Registration Profile management area and the IM Server. There are three input fields: "User ID:", "Password:", and "Repeat Password:". Each field has a text box and a hint to its right: "Letters, numbers or (.!@#\$%^&_+~)" for User ID and Password, and "Same as above." for Repeat Password. At the bottom, there are two buttons: "Continue in browser" and "Cancel".

Software Registration Support

Create a New Registration.

Start by choosing a registration User ID and Password. These will be used for logging into your Registration Profile management area by browser, and will also be used for logging into the IM Server for programming over the Internet.

User ID: Letters, numbers or (.!@#\$%^&_+~)

Password: Letters, numbers or (.!@#\$%^&_+~)

Repeat Password: Same as above.

IM Server: User Registration

- When you open the Programming Software, a registration screen will appear. Select a User ID and Password, then click “continue”. Note, the User ID and Password are both case sensitive.

The screenshot shows the 'Accounts - DoorKing32' application window. The 'Registration' menu item is highlighted in the top toolbar. A 'Software Registration Support' dialog box is open, titled 'Create a New Registration.' The dialog contains instructions and input fields for User ID, Password, and Repeat Password. The User ID field is pre-filled with 'RSM.DK'. The Password and Repeat Password fields are masked with dots. The dialog also includes 'Continue in browser' and 'Cancel' buttons.

[live chat mac](#)

IM Server: User Registration

- Select the method of programming you wish to use when sending data from your PC to the Entry System. If you select the IM Server option, you will also need to agree to the terms and conditions.

DKS Software Registration

Logged in as:
Ron Miller
[RSM.DK]

Decide whether you'll be using Internet Programming.

This ends step 1 of 2:

1. **Registration.**
2. Internet programming setup (optional).

[live chat mac](#)

Please select one of the following three options (you can change this selection later by logging into your Profile page).

☒ **I want to program my entry systems using an Internet Connection at my PC.**
Choosing this option will set up a subscription to the DoorKing Internet-to-Modem Server (IM Server). This is the easiest and most effective way to connect from your programming PC to your Entry Systems. Most people select this option.
There is no obligation and you can use the IM Server free for a [30 day trial](#) (1 free trial per system phone number).

☐ **Data Entry Only. I will not be activating any entry system subscriptions. I will only be connecting to systems that already have subscriptions to the IM Server.**
Choose this option if you will be programming Entry Systems that have a subscription being paid by another User account. You will be able to connect with any system that has been activated by another party. You will periodically receive program and product update information. There is no cost for this "Data Entry Only" registration.

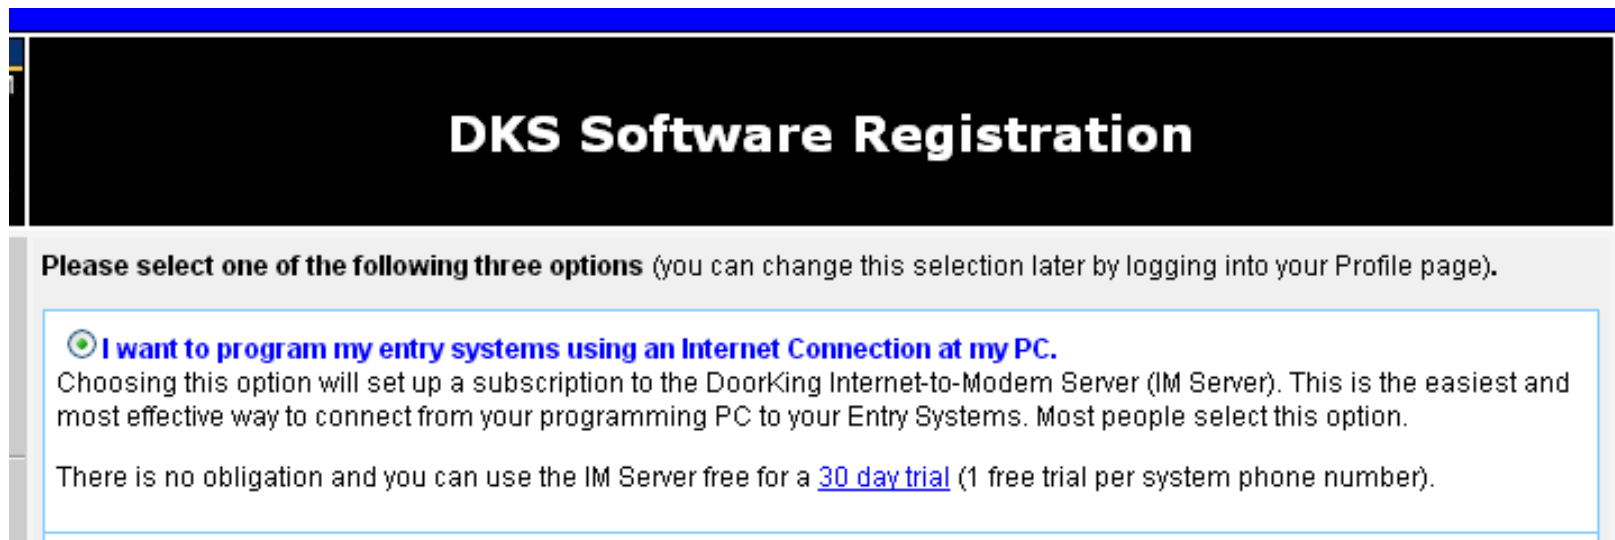

☐ **I will not be using an Internet Connection at my PC when programming my entry systems.**
Choose this option if you will be providing a Dial Up Modem and Telephone Line at your programming PC, or if you will be using a direct connection between your PC and Entry Systems, or if you are using a Network Adaptor to connect your Entry System to a LAN or WAN. There is no cost for this registration. You will periodically receive program and product update information.

☒ I have read and agree to all the [terms and conditions](#) of this service.

Advantage - DoorKing®

What is the DoorKing IM Server™

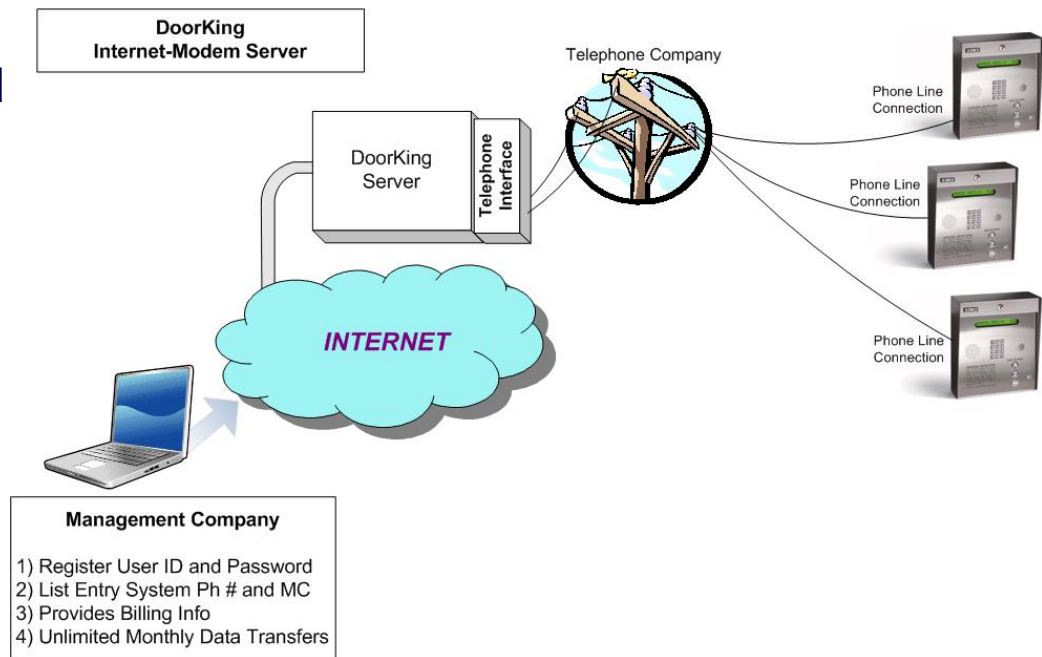

- The DoorKing IM Server is a subscription based website that will simplify programming connections between your PC and your Entry Systems
- Subscribing to the IM Server site combines the best of both worlds:
 - ✓ An Internet connection at the PC is the easiest and most cost effect method for data transfer at the PC.
 - ✓ A Modem connection at the Entry System is the easiest and most cost effect method for data transfer at the Entry System.
- The DoorKing IM Server links your computers Internet connection to the Modem inside the entry system
- This offers a simple, reliable and easy to use method to Send and Receive data from your systems

Advantage - DoorKing®

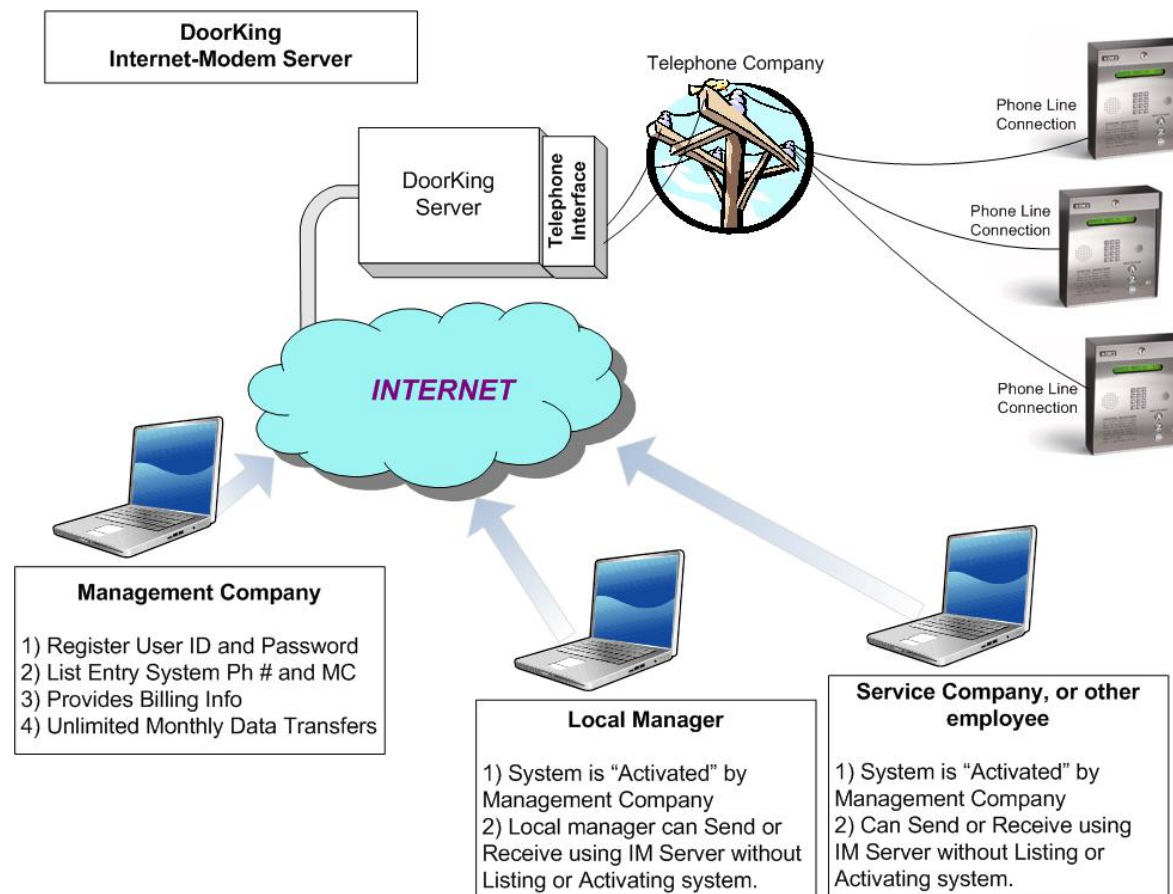

DKS Internet Modem Server™

1. PC sends the Database to the DK IM Server
2. The IM Server converts the database to a Modem package.
3. The IM Server dials the entry system and sends the database via modem to the Entry System.
4. PC can send data to multiple systems in one programming step.

Advantage - DoorKing®

- Each system only needs to be activated one time, by one person. Once activated, other staff members or offices can connect through the IM Server

DoorKing Has A Better Way!

DKS Internet Modem Server™

- ✓ No Modem Needed at the PC
- ✓ No Modem Software
- ✓ No Modem Setup Strings
- ✓ No Distance Limitations
- ✓ No Trenching to Run Wires
- ✓ No New Hardware to Install
- ✓ No Site Visit Required
- ✓ No hardware power requirements
- ✓ No Internet connection needed at Entry System
- ✓ Connect to Unlimited Systems

IM Server: User Registration

- If you select the Internet Programming option, you will need to list each entry system that you wish to program through the IM Server. You will need to “System Phone Number” and “Master Code”
