ROLL WITH MASTER-HALCO

Gate Fittings

ADAPTRACK GATE CONVERSION KIT

The adaptable conversion kit is a complete set of track, hardware and accessories designed to convert a standard gate into a smooth sliding cantilever gate.

The track is a specially designed aluminum extrusion. The shape of the extrusion provides an enclosed chamber through which the truck assemblies roll.

Brackets are included to mount the track to either round (2-3/8" O.D.) Or square (2") horizontal top rails.

The flat-back design of the track makes it possible to mount the track, without brackets, directly to the flat surface of a wood gate.

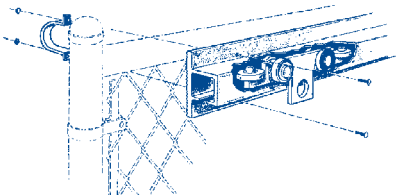

NOTE: APPROXIMATELY 4" FROM FACE OF POST TO FACE OF GATE FRAME.

ADAPTRACK GATE CONVERSION KIT
